# Awesome Kicker v1.0
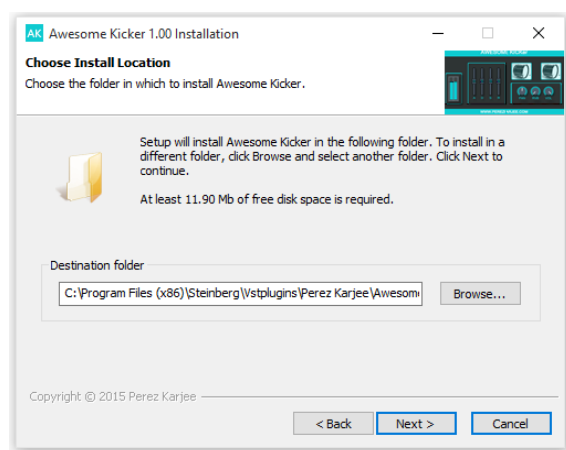

Windows Manual

Installing

You can choose to install either 32bit or 64bit Of Awesome Kicker, depending on your operating system or DAW(some DAWs even support both 32bit & 64bit, such as FL Studio)

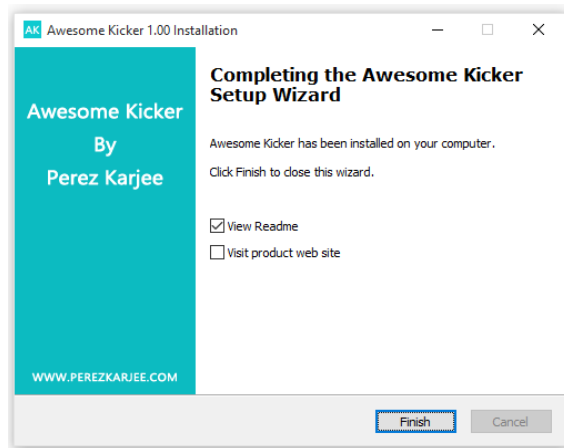

After Downloading the installer, just like any other installer, start hitting next>next.. to install

The default installation location for 32bit is
C:\Program Files (x86)\Steinberg\Vstplugins\

And The default installation location for 64bit is
C:\Program Files\Steinberg\Vstplugins\

But you can install anywhere you want, as long as your DAW or host can detect
it

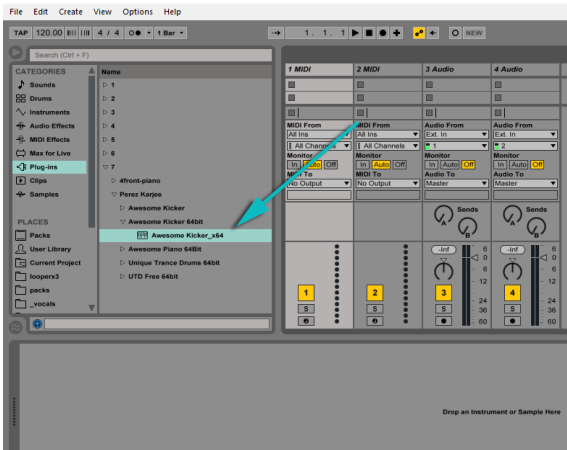

Hit finish, when it's done

Using With Ableton Live

After Installing the plugin, live will automatically detect the plugin when you
start live. but if it doesn't-
Go to live's preferences>File Folder

And choose the VST folder by clicking browse And then hit rescan, if required

Now just drag and drop the plugin into your midi track from the plugins list and start using just like any other plugin

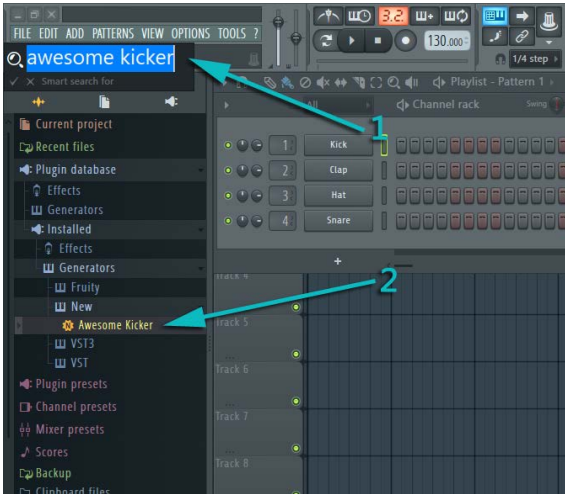

Using With FL Studio

After installing the plugin, launch FL Studio and go to Tool>Plugins>Manage Plugins

Add your VST directory location, if you haven't already, and then hit 'start scan'

After Scanning close the plugin manager, and from the VST list, choose the Awesome Kicker plugin or you can just do a search for 'Awesome Kicker'

Now, just drag Awesome Kicker to the channel rack, and start using just like any other plugin

Other DAWs/Hosts

Other DAWs/Hosts have the similar methods to work with plugins, you can check the manufacturer's manual for more info
