LIVE WALLPAPER CREATOR

(Patent Pending)
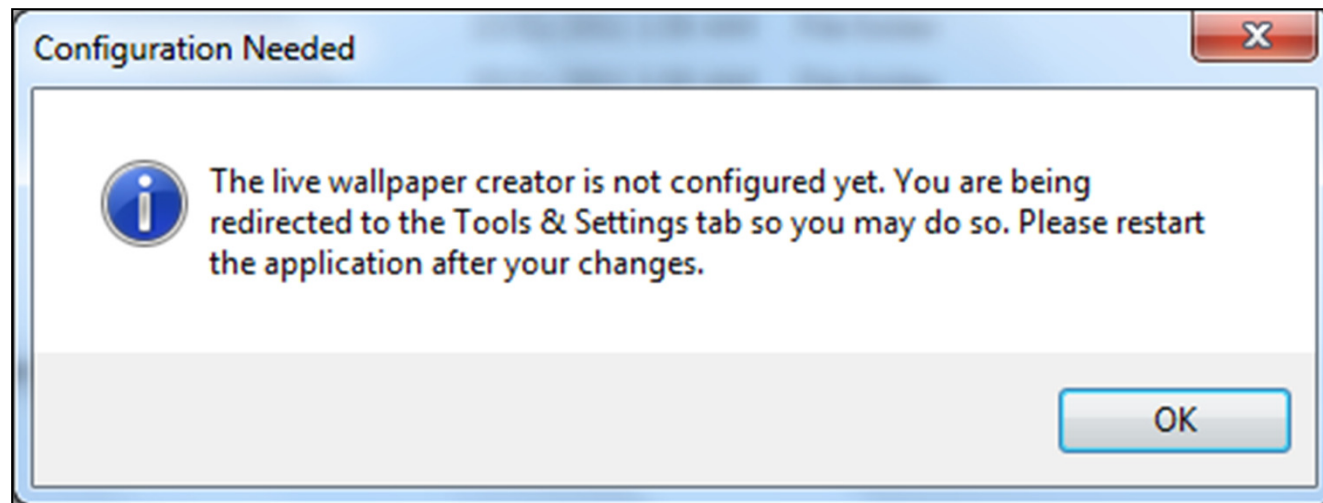

STEP 2:
CONFIGURE THE LIVE WALLPAPER CREATOR

http://www.youtube.com/watch?v=-_BxTOvSz_M

Starting the Live Wallpaper (LWP) Creator

- Navigate to the LWP Creator folder and run LiveWallpaperCreator.
- If this is the first time you are configuring the LWP Creator, you will see a message telling you to configure the program.
- Click OK and wait for the LWP Creator to appear.

Configuration Needed

The live wallpaper creator is not configured yet. You are being redirected to the Tools & Settings tab so you may do so. Please restart the application after your changes.

OK

Configuring Application Settings

- You will now see the Tools & Settings tab.
- At the bottom, you will see Application Settings that has 2 fields:
    1. Java folder.
    2. Android SDK folder.
- By default, all fields are set to NOT SET.
- You will need to click on each button and locate the corresponding resources on your computer.

Configuring Application Settings (cont.)

- Set each path by clicking on its corresponding button.

- You should know the locations of both settings from installing the components from the first guide.

- Once you have set the parameters, click Save Application Settings and restart LWP Creator (pics below).

Setting up the Configuration tab (cont.)
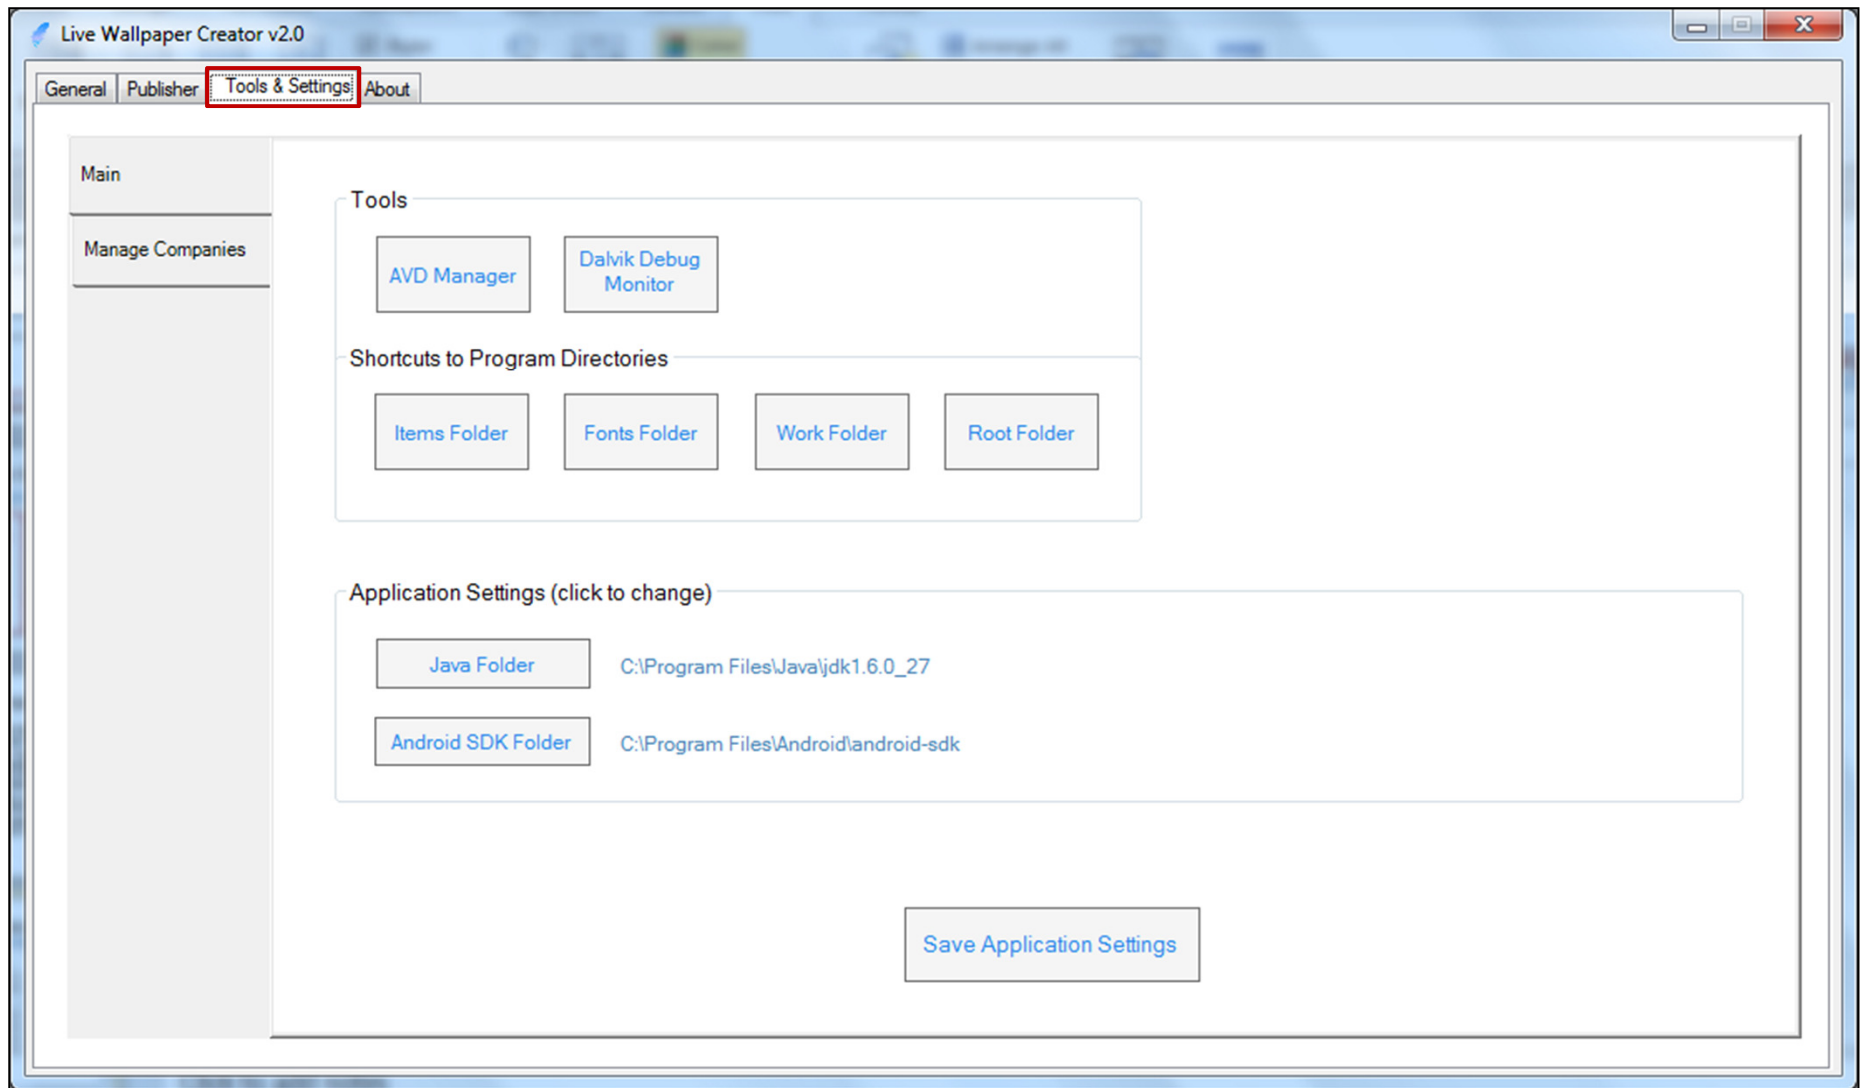

LWP Creator Main Screen

Tools and Settings Tab

- The Tools and Settings tab has a number of useful tools and shortcuts such as:

    1. Company Management tab. (This will allow you to create companies, manage application description text, and create or import keys that you will use to sign your applications).

    2. Android Tools. (These will help you test your live wallpapers and take screenshots).

    3. Shortcuts to Program Directories. (These will help you access different parts of the LWP Creator folder).

Tools & Settings Tab (cont.)

Company Management

- Before you can start creating live wallpapers, you have to create a new company profile.

- A company profile will store and associate your publishing name, application description and a key.

- All applications MUST be signed with a key before they can be published or installed on a device.

- You can create a new private key, or import an existing key while creating a company profile.

- For more information on keys, visit http://developer.android.com/guide/publishing/app-signing.html

- To create a company profile, go to Manage Companies sub-tab, click Add and fill out the required fields.

- When you create your own key, use your own information. For this tutorial, we will write demonstration in all the fields.

- To import your own key, choose Import Existing and click Select Key File. In the new window, find they key you are trying to import and click Open.

- Once you have entered all the information, click Add Company.

- You can use the %APPNAME% variable in the Description text field to reference your application name.

- Most control elements in LWP Creator have help tooltips that appear if you hover over a control. If you are unsure what something means, try hovering over it with your mouse pointer!

Creating a Company Profile

Overview Checklist

- You have configured the Application Settings
- You have created a Company Profile

CONGRATULATIONS!

You have completed the second step to creating your own Live Wallpapers!

MOVE ON TO STEP 3!

Create a new live wallpaper.
