LIVE WALLPAPER CREATOR

(Patent Pending)

STEP 1:

SET UP ENVIRONMENT

http://www.youtube.com/watch?v=Nf0ED8P20C4

Dependencies

IF YOU DO NOT HAVE THESE, THE LIVE WALLPAPER CREATOR WILL NOT WORK!!

- .NET Framework v3.5 SP1:
  http://www.microsoft.com/download/en/details.aspx?id=22

- Java/Java Development Kit (JDK) v1.6 update 27:
  http://www.oracle.com/technetwork/java/javase/downloads/jdk-6u27-download-440405.html

- Android SDK:
  http://developer.android.com/sdk/index.html

Installing .NET Framework

- Without the .NET Framework installed on your machine, the Live Wallpaper Creator simply will not launch.

- It is likely that your machine might already have .NET Framework installed, especially if you are running Windows Vista or Windows 7 (in which case you may skip this step).

- In case you do not have it installed, simply download it from the official website (link on page 2), run it, and patiently wait for the framework to install.

Installing the JDK

- The Live Wallpaper Creator is only compatible with Windows, therefore your options for the JDK are:
    a) Windows X86 – Windows 32-bit version.
    b) Windows X64 – Windows 64-bit version.
- Once you have downloaded the JDK, simply run the executable and follow the on-screen instructions.
- The JDK will install Java on your machine.

Installing the Android SDK

- You have 2 options:

  a) Download the executable (recommended by Android).

  b) Download the zip package.

- Download the executable for less hassle, run it, and follow the on-screen instructions.

- The Android SDK will provide several useful tools, that will be later used to create Live Wallpapers.

Running the Android SDK

- Once you have installed the Android SDK, it will automatically prompt you to download and install Android packages.

- You will need to download the *SDK Platform* of Android 2.1, API 7 package, as well as the *Android SDK Platform-tools* package for the LWP Creator to work. However, you may install as many packages as you want.
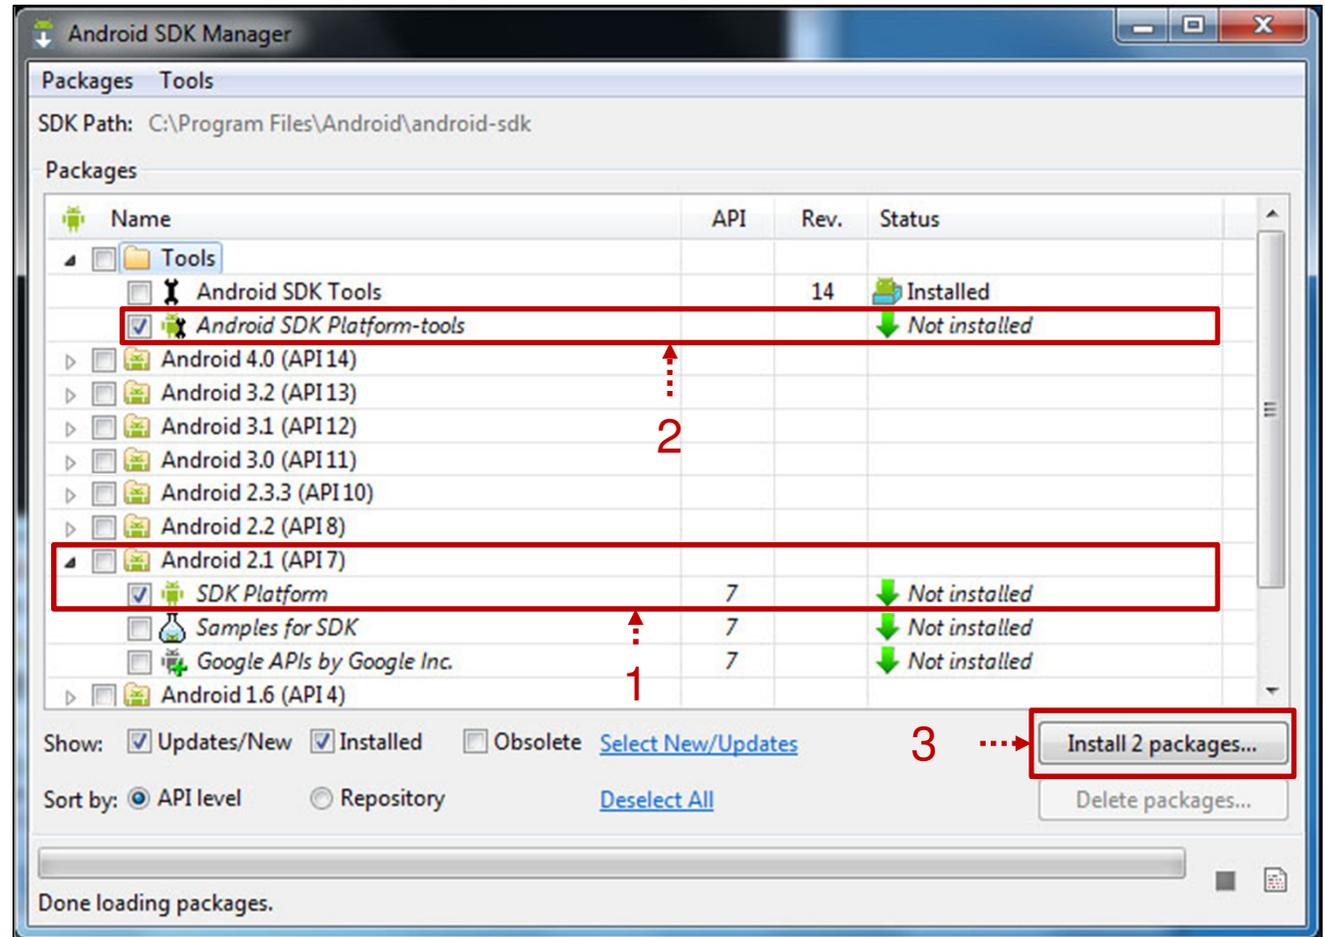

Installing Android packages

- It may take some time to download and install the packages. You will see a progress bar.

- Once it is done, click "Close" and exit the SDK Manager.
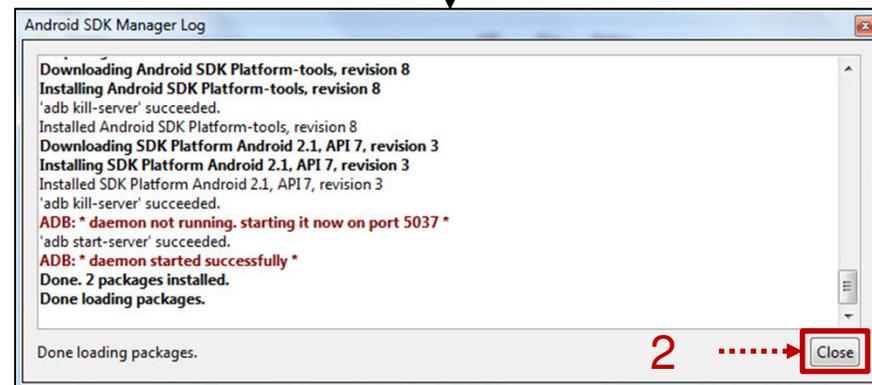

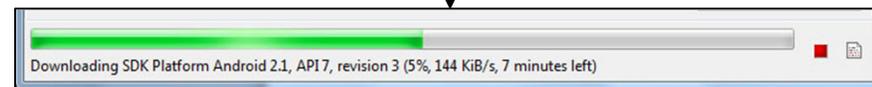

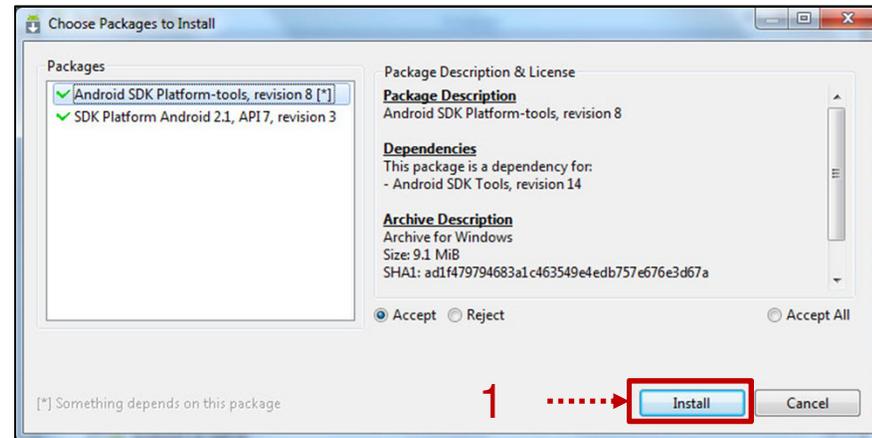

Overview Checklist

- You have downloaded and installed the .NET Framework
- You have downloaded and installed the JDK
- You have downloaded and installed the Android SDK
- You have downloaded the SDK Platform Android 2.1, API 7 package

CONGRATULATIONS!

You have completed the first step to creating your own Live Wallpapers!

MOVE ON TO STEP 2!

Configure the Live Wallpaper Creator.
