

QDLPluginEncryptionPS 1.0.0

Readme File

01/03/2014

Welcome to QDLPluginEncryptionPS 1.0.0!

Thank you for enjoying the latest plugin version. This file contains informations not included into the reference documentation yet.

QDLPluginEncryptionPS Requirements

The plugin is shipped into the new **Xojo** format (**.xojo_plugin**) and into the **RealStudio** (**.rbx**) one: you can use it starting from **RealStudio 2011 Release 4**. Also, the plugin requires that the **QDLPluginBasePS** is installed; if this is not the case, it is freely downloadable from the [PatiSoftware's Products Page](#).

If you are trying the QDLPluginEncryptionPS Demo version: this version is fully-featured and functional to offer a true test of the software; it just does not allow you to create stand-alone applications using the plugin but it is otherwise identical to the retail version. You will obtain a full working version of the plugin upon purchase

Supported Platforms and Targets

The plugin can be used with both the **MacOS X** and **Windows** versions of Xojo (or RealStudio 2011 R4) IDEs.

Whatever is your IDE version, the plugin will allow you to compile your project for:

-Mac OS X 10.4 and later Intel

-Windows 98/NT/2000/XP/Vista/7/8

Plugin Installation

To use the QDLPluginEncryptionPS API, simply create a folder, if it does not already exist, in the same folder as the RealBasic application called "Plugins" then, toss the plugin into this folder and fire-up Xojo/RealStudio. Your new application can now take advantage of the added

functionality of the new plugin. In order to avoid any conflicts or problem with earlier versions of the plugin, be sure to remove any pre-existing QDLPluginEncryptionPS version from the "Plugins" folder.

Documentation

The **QDLPluginEncryptionPS User Reference** is built into the plugin and can be accessed by selecting the "**Help>Plugin References>QDLPluginEncryptionPS**" sub menu item from the IDE's menu bar.

You can find more documentation and technical resources related to this and other products of ours visiting the [Developing Central](#) page.

Acknowledgements

I have to give a thank to all of that people who has contribute to improve the plugin by acquiring and using it and by sending to me compliments, suggestions, comments, bugs reports and so on.
